Stay 3m away from opponents during restarts.	Interfere with a pleyer attempting to restart the game.	Progressive punishment.

Handball

Playing Positions and Officials

Goalkeeper – The player who defends the goal with every part of their body. The goalkeeper is the **ONLY** player who can touch the ball with their feet.

Centre – A creative handball player who directs play in both defence and attack. Also known as the ‘playmaker’ and sets up the tactics and the players shooting positions.

Left and Right Backs – Usually the largest players on the handball team. When defending, they try to block shots, and in attack they are the long range shooters.

Pivot – The creative force in attack and main disruption to the defending opponents. They are quick to get between opposing defenders to create openings for teammates or to get into good scoring positions themselves.

Left and Right Wingers – the fast players who patrol the sides of the court. They counter opposing wingers and in attack look to create openings for others or shoot from more difficult angles.

Substitutes – Substitutions are allowed at any time without limit or stoppage. There are 7 substitutes on each side-line, but they cant enter the play until the player they are replacing has left the court.

The Officials – there are 4 handball officials; scorekeeper, timekeeper, and 2 referees.
