

Dear Parents & Carers,

It was lovely to welcome students back on Monday after what we hope was a good Easter break, with some opportunity to benefit from the sunshine and slight easing of restrictions.

In school, we continue to support the Government guidance for safe working. Therefore, students and staff maintain social distancing where possible, wearing face coverings in communal areas and in classrooms. Hand sanitising is still expected, with wall mounted hand sanitisers readily available around the site. The year group bubble arrangement is still in place along with the split break / lunch times, to avoid contact between year bubbles as much as possible.

However, we are pleased to be able to now tentatively offer some other activities which up until recently have not been possible. This weekend is a good example, where Year 10 Duke of Edinburgh students will undertake a large part of what would have been their overnight expedition. Whilst they are unable to camp overnight, they will still do their planned route walk and return to school to demonstrate the other skills that would normally have been assessed out in the field. I would like to thank Mr Cox and Mrs Davis therefore for leading and supporting these arrangements.

Yesterday we held a virtual Year 11 Progress Evening. We hope that the opportunity for parents and carers to talk to their child's teachers was useful, with advice about how students may continue to make improvements. For Year 9 students, the outcome of the Pathways process will be shared over the next fortnight.

Finally, we have welcomed two new colleagues to our staff team. Mr Middleton has joined the Site Team as Janitor and Mr Farrow has started his role as minibus driver. A warm welcome to both!

Enjoy the weekend

Lateral Flow Testing

Thank you for your continued support with lateral flow testing. We have been advised that it is vital that staff and students continue to test twice weekly (Sunday and Thursday) in order to identify asymptomatic cases of coronavirus (COVID-19) and prevent the spread of the virus.
